Asthma Control Test™ is:

- A test for people with asthma 12 years and older – it provides a numerical score to help assess asthma control.
- Recognized by the National Institutes of Health (NIH) in its 2007 asthma guidelines.¹
- Clinically validated against specialist assessment with spirometry.²

PATIENTS:

- Write the number of each answer in the score box provided
- Add up the score boxes to get the TOTAL.
- Discuss your results with your healthcare provider.

1. In the past 4 weeks, how much of the time did your asthma keep you from getting as much done at work, school or at home? **SCORE**

All of the time Most of the time Some of the time A little of the time None of the time

2. During the past 4 weeks, how often have you had shortness of breath?

More than once a day Once a day 3 to 6 times a week Once or twice a week Not at all

3. During the past 4 weeks, how often did your asthma symptoms (wheezing, coughing, shortness of breath, chest tightness or pain) wake you up at night or earlier than usual in the morning?

4 or more Nights a week 2 to 3 nights A week Once a week Once Or twice Not at all

4. During the past 4 weeks, how often have you used your rescue inhaler or nebulizer medication (such Albuterol)?

3 or more Times per day 1 or 2 times Per day 2 or 3 times Per week Once a week Or less Not at all

5. How would you rate your asthma control during the past 4 weeks?

Not controlled At all Poorly controlled Somewhat controlled Well controlled Completely controlled

- If your score is 19 or less, your asthma may not be as well controlled.
- If your score is 15 or less, this may be an indication that your asthma is very poorly controlled.
